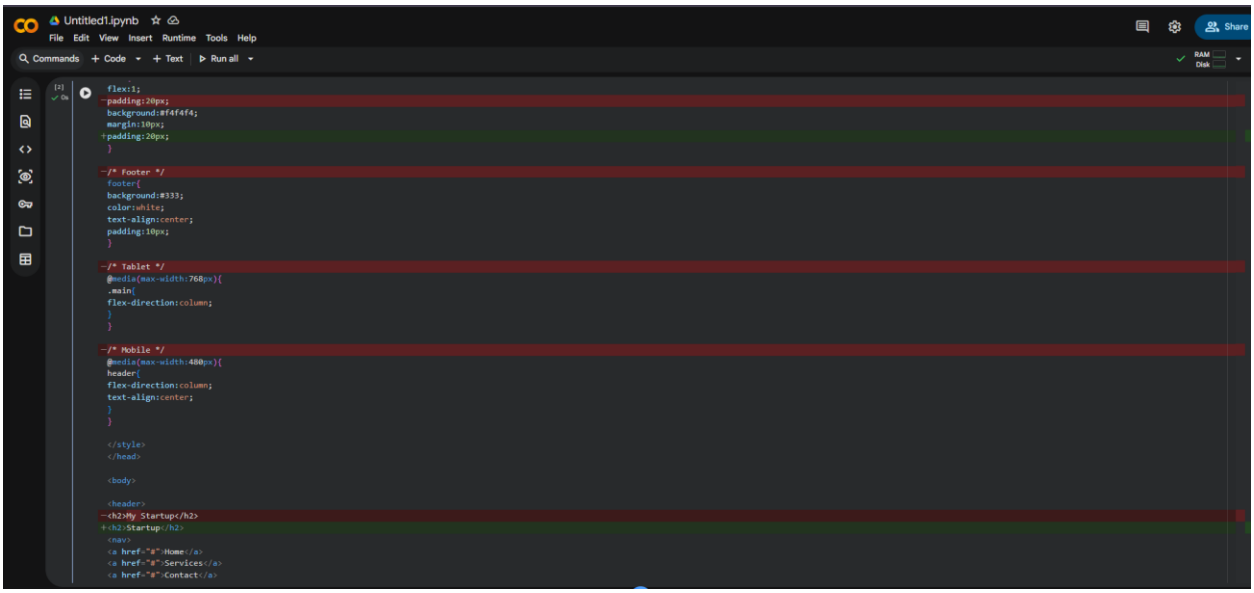
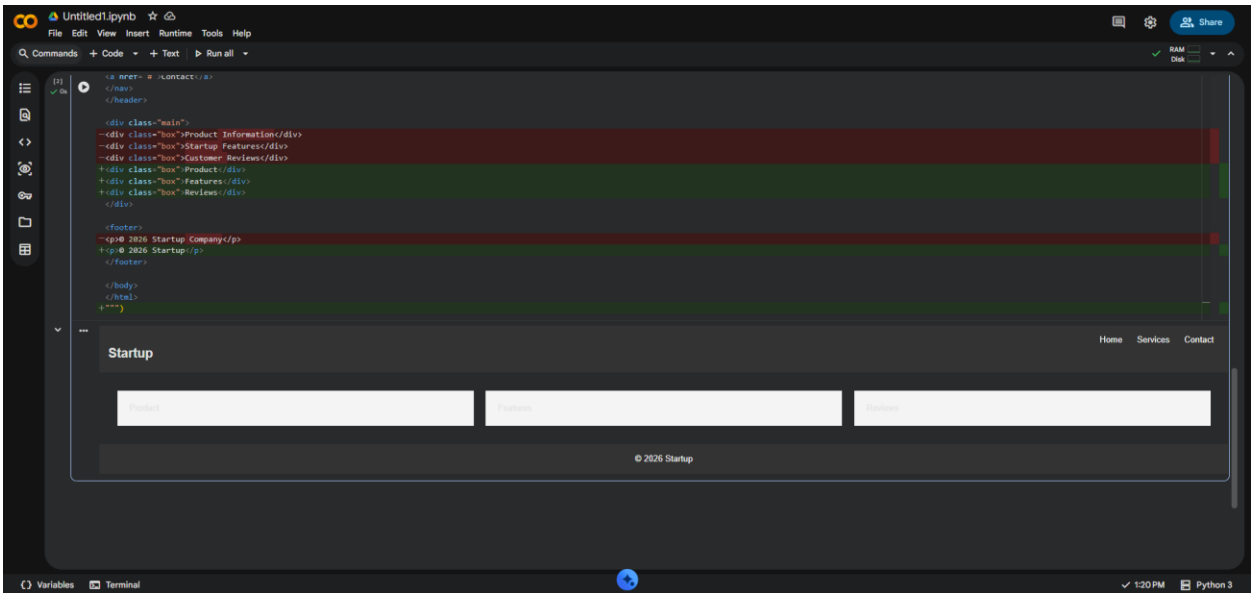
LAB ASSIGNMENT-14.4

2303A51820

Task 1: Responsive Homepage Layout for a Startup Website
Scenario:
You are designing a basic homepage for a startup company that needs to look good on desktops, tablets, and mobile devices.

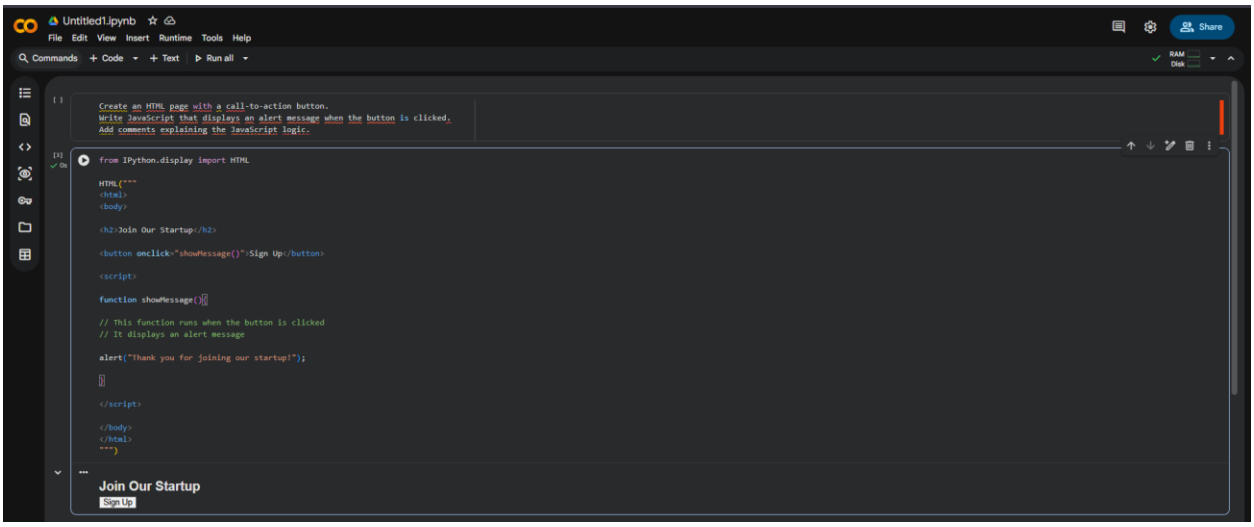




Task 2: Interactive Call-to-Action Button

Scenario:

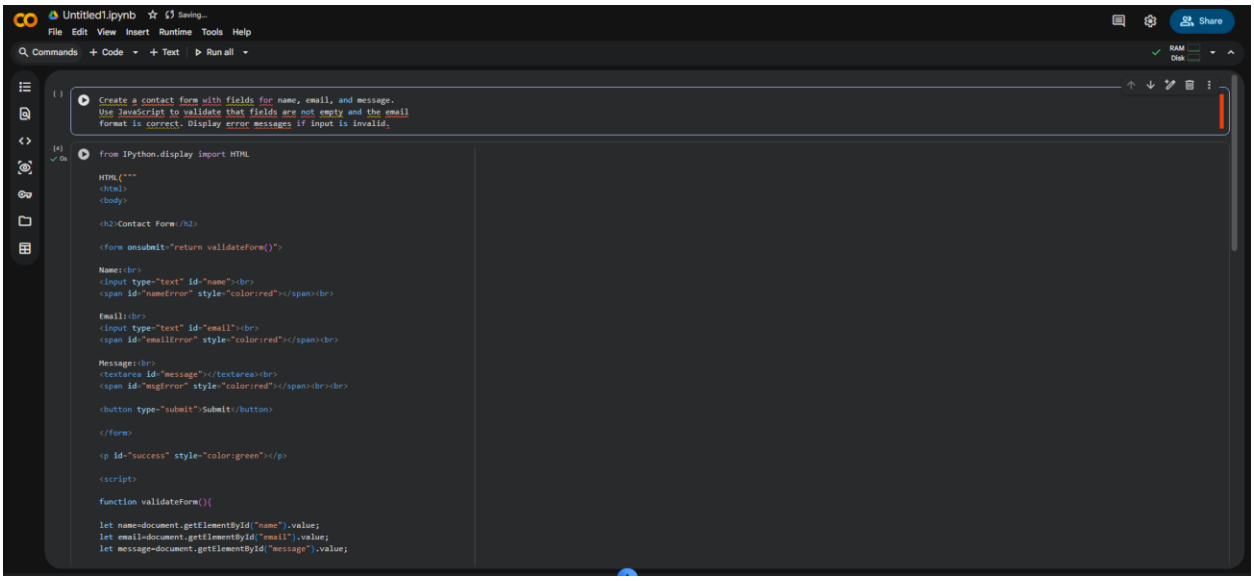
A marketing page requires a call-to-action button that responds when users interact with it.

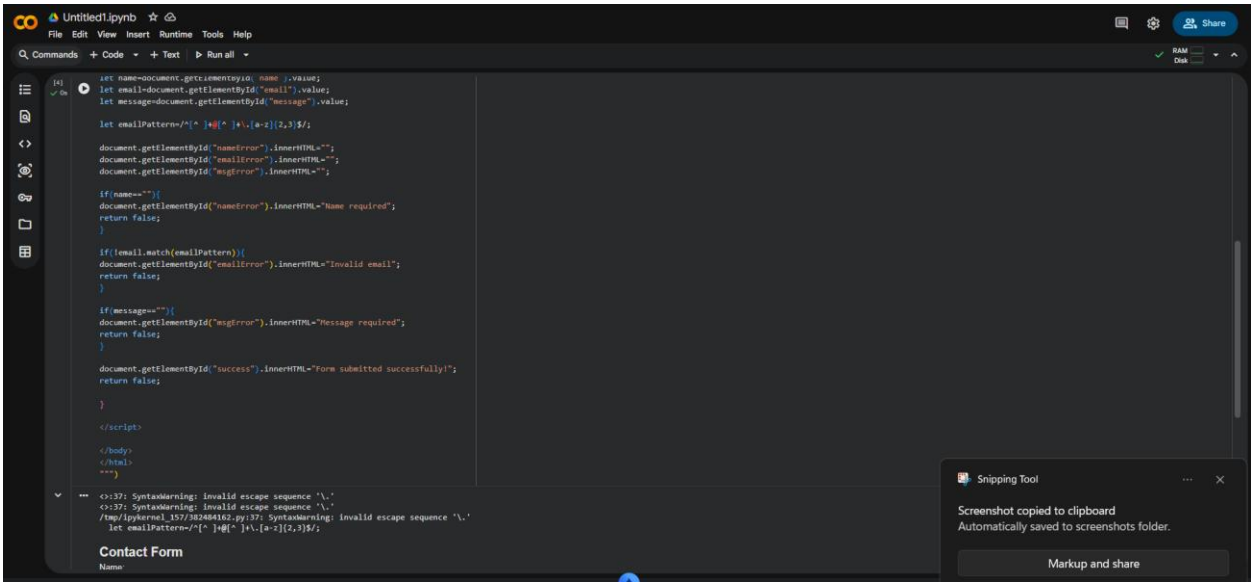


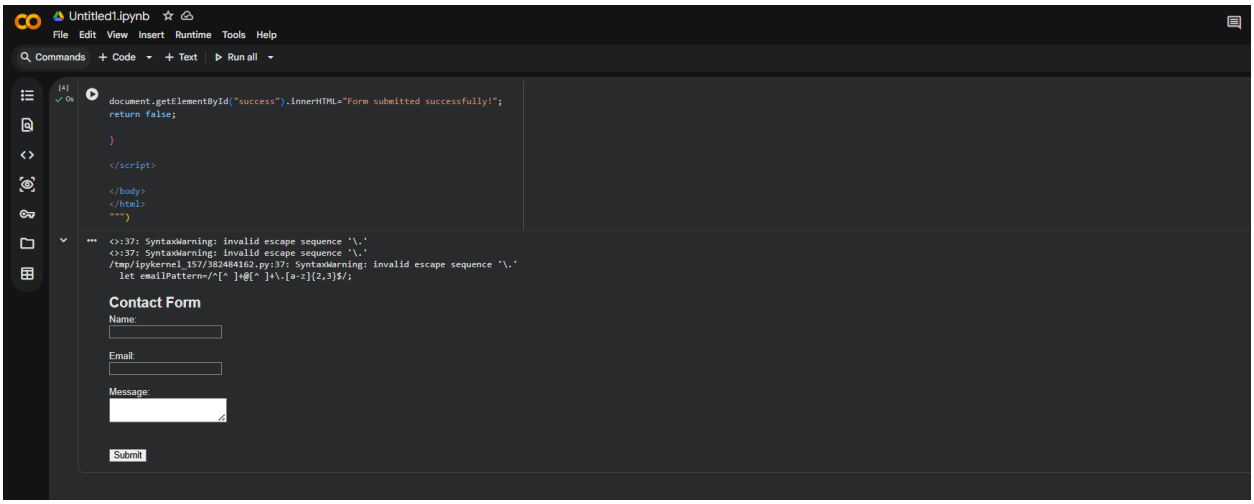
Task 3: Contact Form with Client-Side Validation

Scenario:

You are developing a contact form for a company website to collect user queries safely and correctly



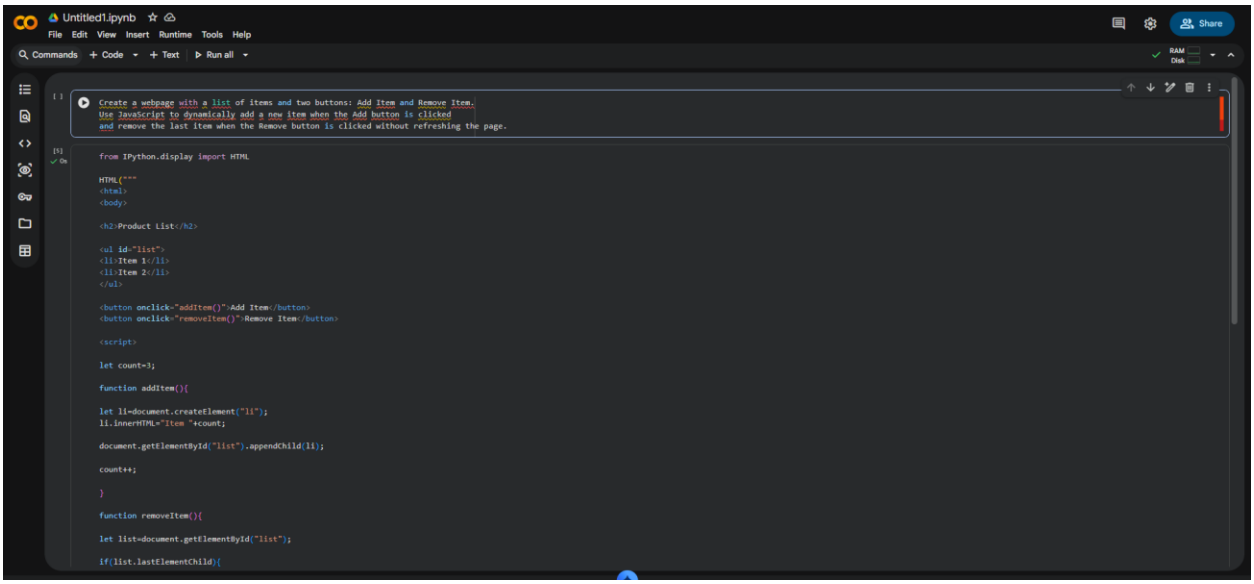




Task 4: Dynamic List Management for a Product Page

Scenario:

A product listing page needs to add or remove items dynamically without refreshing the page.



```
<script>

let count=3;

function addItem(){

let li=document.createElement("li");
li.innerHTML="Item "+count;

document.getElementById("list").appendChild(li);

count++;

}

function removeItem(){

let list=document.getElementById("list");

if(list.lastElementChild){
list.removeChild(list.lastElementChild);
}

}

</script>

</body>
</html>
""")
```

Product List

- Item 1
- Item 2

Add Item | Remove Item

Task 5: Modal Popup for User Notifications

Scenario:

You are building a user notification popup for announcements or alerts on a website.

```
Generate HTML, CSS, and JavaScript for a modal popup notification.
Include a button to open the modal, a semi-transparent overlay,
and options to close the modal using a close button or clicking outside the modal.
```

```
from IPython.display import HTML

HTML("""
<html>

<head>

<style>

.modal{
display:none;
position:fixed;
top:0;
left:0;
width:100%;
height:100%;
background:rgba(0,0,0,0.5);
}

.modal-content{
background:white;
width:300px;
margin:100px auto;
padding:20px;
text-align:center;
}

</style>

</head>

<body>

<button onclick="openModal()">Open Modal</button>

<div class="modal" id="modal">
